

# Multi Output Box (MOB)

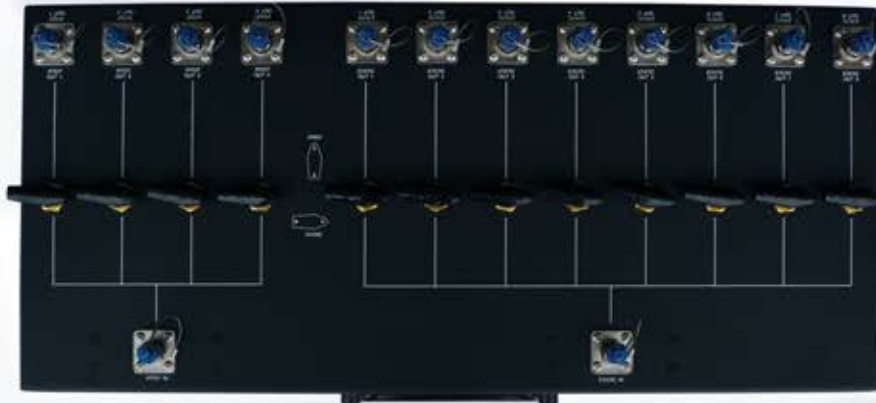

Compatible with all Laversab testers

MOB-36

MOB-44

MOB-48

MOB-316

## MOB (Multi Output Box)

The Laversab family of Multi Output Boxes (MOB) simplifies air data checks for all aircraft. The Laversab MOB connects a single Air Data Tester to multiple Pitot Static systems through a manifold. It enables operators to individually isolate each connection to the aircraft, which helps to find and resolve leaks quickly while minimizing hose connect/disconnect time. A Laversab MOB is essential to simplify and shorten the leak-test of any aircraft.

### SPECIFICATIONS

For aircraft with Pitot and Static ports only				
Model #	Inputs		Outputs	
	Pitot #4-AN	Static #4-AN	Pitot #4 or #3-AN	Static #6 or #4-AN
MOB-36	1	1	3	6
MOB-44	1	1	4	4
MOB-48	1	1	4	8

For aircraft with Pitot, Static and AOA ports							
Model #	Inputs with Quick-disconnects			Outputs with Quick-disconnects			
	Pt	Ps1	Ps2	Pt	Ps1	AOA top	AOA bottom
MOB-316	1	1	1	4	4	4	4
